

HOW TO CONFIGURE YOUR NAMESERVERS

Once you have bought your domain name you need to make sure that your domain is pointing to the hosting company's domain name servers. These are:

- ns1.tinynetworks.co.uk
- ns2.tinynetworks.co.uk
- ns3.tinynetworks.co.uk

If you allow us to buy and manage your domains, you can just ignore this section.

123 REG INSTRUCTIONS

Our preferred domain registrar is 123-reg. To set your domain to point to the correct nameservers:

1. Log into your 123-reg control panel
2. Select the domain to manage
3. Click on "Modify Domain"
4. Click on "Change Nameservers"
5. Enter the nameservers above into the first three boxes
6. Click on "Change Nameservers"
7. You should hopefully see confirmation that the domain servers have changed.

Other domain registrars will probably be similar – check their 'help' section.
